

## Global Fax Trends

Fax is the preferred delivery mechanism for critical documents.

Companies serious about meeting governance standards for all critical documents implement fax across the entire organisation.

## Profax – Free Fax to Email

**Profax fax to email allows any individual or company with an email address to receive faxes directly into their inbox FREE!**

### Why Use Fax?

Fax still remains the most effective option for delivering critical documents such as purchase orders, invoices, statements and application forms – **Fax is a secure point to point solution.**

### Why do I need a fax inbox?

- A fax inbox ensures that all faxes directed to individuals reach them securely and timeously
- No more wasted time looking for documents at a central fax machine
- No more lost faxes
- Private faxes are made available only to those people who have the rights to view them
- Saves time and money and improves productivity

### How does Profax work?

You are allocated a unique Profax 086 number supplied by Telkom. The Profax service automatically links this number to your email address, and any fax sent to your fax number is delivered to your email as an e-mail attachment. In addition, you have the option of sending faxes via your email to any fax number globally.

### Benefits of Fax to Email

- Inbound faxes are FREE of charge
- No setup or monthly fees
- Every individual with an email address can have a fax number
- No staff needed to manage the solution
- No software or hardware is required
- Fax numbers can be kept for life, even if individuals or companies move
- Faxes remain confidential as they are delivered directly to the email address.
- Telkom fax lines can be freed up or used as voice lines.

To get YOUR Free Fax to Email visit us at
